

PROJECT BRIEF

Historic District Board of Review Application for Certificate of Appropriateness at 117/119 St Michaels Ave. to tear down current garage and replace with new garage.

Application Date: August 20, 2024
 HDBR Meeting Date: September 23, 2024

Project Description:

Certificate of Appropriateness application to tear down current garage and replace with new garage.

Current Zoning:

HISTORIC DISTRICT RESIDENTIAL (HDR)

Project Location:

117/119 St. Michaels Ave

Applicant:

Duane and Sheryle Raab
 117 St Michaels St.
 Madison, IN 47250

Owner:

Same

Supporting Documents:

- COA application
- Photographs
- Copy of HDBR meeting public sign

Alterations, Historical Information, & Prior Approvals:

Date	1860
Style	Italianate
Evaluation	Contributing
Survey Notes	

Alterations: Replacement wood doors with transoms

Historical Information/Misc. Important Information:

Prior COA Approvals:

Guidelines, Standards, & Ordinances

HDBR Guidelines:

Madison Historic District Design Guidelines – 24.0 NEW CONSTRUCTION — OUTBUILDINGS p. 101-102

- 24.1 The design of new garages and other accessory buildings should be compatible with dwellings in the historic district. New outbuildings should respect and blend with the architectural style and scale of the associated dwelling.
- 24.2 Site new garages and accessory buildings appropriately on the lot. Locate detached new garages and outbuildings to the rear of a dwelling or set back from the side elevations. Attached garages and accessory buildings should be set back from the front façade of the primary dwelling at least one-third of the total depth of the dwelling.
- 24.3 If reconstruction of a missing garage or outbuilding is desired, it should be based on accurate evidence of the original configuration, form, massing, style, placement, and detail from photographic evidence or other documentation of the original building.
- 24.4 The outbuilding should maintain a proportional mass, size, and height to ensure it is not taller or wider than the principal building on the lot.
- 24.5 Materials used for new garages and outbuildings should reflect the historical development of the property. Materials used at exterior façades of garages and outbuildings were often different (and less costly) than that of the main dwelling. Materials that are appropriate for new secondary buildings include wood or brick. If frame buildings are constructed, alternative materials may be considered if they resemble traditional wood siding in texture, dimension, and overall appearance. Materials such as T1-11 siding, plywood and oriented strand board (OSB) are not sufficiently durable for exterior use and are not appropriate.
- 24.6 Generally, the eaves and roof ridge of any new outbuilding should not be higher than those of the existing primary building.
- 24.7 Windows which are readily visible from the public right-of-way should be appropriate to the style of the house. Visible pedestrian doors should either be appropriate for the style of house to which the outbuilding relates or be flat with no panels.
- 24.8 Metal garage doors with a paneled design may be appropriate. These doors can be used on garages that are located at the back of the lot and are minimally visible from the street or public right-of-way. If the garage and garage doors are highly visible from a public street or located on a corner lot, solid wood or wood garage doors with a paneled design are more appropriate.
- 24.9 At double garages, two single garage doors rather than one larger, double door should be installed. This will maintain the scale and rhythm of older structures, making a two-car garage seem smaller and more compatible with the primary dwelling.
- 24.10 New carports should be located at the rear of dwellings and not visible. Most carport designs have flat roofs and metal support columns and are not compatible with historic dwelling designs.

Ordinance:

151.34 Visual Compatibility Factors

- (A) Height. The height of proposed buildings shall be visually compatible with adjacent buildings.
- (B) Proportion of building's front facade. The relationship of the width of building to the height of the front elevation shall be visually compatible to buildings, squares, and places to which it is visually related.

- (C) Proportion of openings within the facility. The relationship of the width of the windows to height of windows in a building shall be visually compatible with buildings, squares, and places to which the building is visually related.
- (D) Rhythm of solids to voids in front facades. The relationship of solids to voids in the front facade of a building shall be visually compatible with buildings, squares, and places to which it is visually related.
- (E) Rhythm of spacing of buildings on streets. The relationship of the building to open space between it and adjoining buildings shall be visually compatible to the buildings, squares, and places to which it is visually related.
- (F) Rhythm of entrance or porch projection. The relationship of entrances and porch projections to sidewalks of buildings, squares, and places shall be visually compatible to the buildings to which it is visually related.
- (G) Relationship of materials, and texture. The relationship of materials, and texture of the facade of a building shall be visually compatible with the predominant materials used in the buildings to which it is visually related.
- (H) Roof shapes. The roof shape of a building shall be visually compatible with the buildings to which it is visually related.
- (I) Walls of continuity. Appurtenances of a building such as walls, wrought iron, fences, evergreen landscape masses, and building facades, shall, if necessary, form cohesive walls of enclosure along a street, to insure visual compatibility of the building to the buildings, squares, and places to which it is visually related.
- (J) Scale of a building. The size of a building, the building mass of a building in relation to open spaces, the windows, door openings, porches, and balconies shall be visually compatible with the buildings, squares, and places to which it is visually related.

Secretary of the Interior Standards:

Standards for Rehabilitation

- 2. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.
- 11. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
- 12. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Description/Remarks

This is a 1.5-story duplex in the Italianate style built in 1860. The structural system is masonry. The foundation is rough stone. Exterior walls are brick. Brick is common bond. The building has a gable front roof clad in replacement asphalt shingles with box cornice. Front gable, simple molding on frieze of cornice, window at gable. Windows are historic wood, 4/4 double-hung sashes. 4/4 windows, all openings with segmental arch hoods made of corbelled brick, side windows at 6/6 in flat segmental arch openings. There is a platform/stoop. Replacement wood doors with transoms.

Application for Certificate of Appropriateness

Paper applications will be accepted by the Office of Planning, Preservation, and Design; however, electronic submissions through our Permit Portal are preferred. This application can be submitted electronically at www.madison-in.gov/reporting.

HDBR Staff Review Fee	\$ 10.00
HDBR Application Fee*	\$ 25.00
HDBR Ad Fee*	\$ 15.00
Sign Fee*	\$ 2.00 per street

* Required for applications being heard before the HDBR.

Purpose: All exterior changes visible from the public right-of-way (streets/alleys) within the Madison Historic District requires a Certificate of Appropriateness (COA). Applications must be complete before the HDBR or Staff can begin the review process. Submit this application form, all supplemental documentation as required, and the required fee(s).

This application must be filed at least 15 days prior to scheduled meeting to be eligible for consideration at that meeting. Actual deadlines vary due to holidays, office business hours and operating schedule, media publishing deadlines, etc. Deadlines are published publicly and can also be provided by contacting the Planning Office.

Description of Existing Use: Garage
 Description of Proposed Use: Garage w/ upstairs for side hobby
 Name of Contractor (If applicable): Samuel Girod & ?

Per the City of Madison Historic District Ordinance, an application must include the following in addition to the usual material required for a building permit at the time of application. For site plans all four (4) setbacks from property line MUST be labeled. Only one (1) copy of each supporting document is necessary.

Repair, Replace, or Repair/Replace:

- Structure Plan - Elevations (Only required if making changes to openings or adding/removing features)
- Site Plan MUST have all four (4) setbacks labeled. (Only if changing footprint)
- Photographs (current/proposed) with captions
- Samples/brochures

New Buildings and New Additions:

- Structure Plan - Elevations (Only required if making changes to openings or adding/removing features)
- Site Plan MUST have all four (4) setbacks labeled.
- Floor Plan
- Photographs of proposed site and adjoining properties with captions
- Samples/brochures

Sign and Fence/Walls:

- Photograph of Existing with captions
- Sketches/Photo of proposed
- Samples/brochures
- COA Addendum

Moving Buildings:

- Map showing existing location
- Map showing proposed location
- Photographs of structure with captions

Demolition:

- Photographs with captions

Provide a detailed Narrative statement describing the proposed scope of work. If the project includes more than one type of project, please divide the description into sections.

Demolish current garage and replace with new garage. New garage 28'x28' with 12'x28' pad and lean to side. Variance request for set back on North side. We also want to move the new construction away from the alley to assist with approach.

Include a list of existing and proposed materials for each applicable category. New Construction, Relocation, or Demolition are on the next page.
