Work is primarily on Kentucky side, but do a lot of work up and down the River and with the power plants in particular. As Ewing is about two hours away, they looked for a smaller location to cut down travel time and potentially expand business more to the Indiana side. Most of the employees that serve this area are from the Indiana side of the River. Work would primarily focus on work with metal such as handrail and small piping and pipe hangers. This would include some welding, cutting, and grinding. There would likely be six (6) to eight (8) people working out of this facility on a busy day. They plan to maintain the property neat and well maintained. They have a well-documented safety record with OSHA and have over two-million man-hours of safe work logged. There may be a vehicle or two or equipment staged on-site.

Steve Gray – 3136 Clifty Dr – Owns the property immediately to the south of the applicants and inquired if there were plans to change access to the building on the property to which Mr. Schuler stated there were plans to incorporate an overhead door on that side of the building.
